

Who Is The God Of Medicine?

Consumption of Pharmaceuticals

Martin G. Collins

Given 10-Aug-13; Sermon #1171c

Nearly all the consumption of pharmaceuticals today is a direct result of marketing to the public and covertly bribing physicians to write more prescriptions. There is very little drug consumption based on scientific merit.

No pharmaceuticals actually cure or resolve the underlying causes of disease. Even “successful” drugs only manage symptoms, usually at the cost of interfering with other physiological functions that will cause side effects down the road. There is no such thing as a drug without a side effect. That even includes the “innocent” drugs that we have, such as aspirin, ibuprofen, and so on.

The greatest threat to the U.S. today is not terrorists, but the mass genocide of Americans who die every year at the hands of the corrupt U.S. Food and Drug Administration (FDA). According to their own webpage, titled “Why Learn about Adverse Drug Reactions (ADR)?”, the FDA admits that 100,000 people die every single year as a result of taking FDA-approved pharmaceutical drugs.

Two million people a year suffer from serious ADRs, which include things like stroke, heart attack, and permanent neurological damage. Studies going back at least 15 years make it clear that the FDA is fully aware of the extensive harm being caused by supposedly “safe” drugs.

The agency has done little or nothing to address the problem, making it complicit in willfully harming and murdering tens of millions of Americans throughout just the past several decades, which makes it one of the most murderous government regimes in history.

Based on figures presented by the FDA, at least 30 million people have suffered serious injury or death as a result of taking FDA-approved drugs since 1998, when the first cited study was published. If you go back more

decades, potentially hundreds of millions of people have been directly harmed by the FDA's "negligent homicide."

Since the FDA is the official gatekeeper of pharmaceutical drugs, it is directly responsible for the harm they cause by peddling poison as medicine. The FDA is nothing more than an organized crime ring that benefits politically and provides increasing profits to corporations.

In medicine, for example, the search for new drugs is not about helping humanity; it's about helping quarterly profits. Only the most naïve individuals today still believe Big Pharma cares about human beings. (Big Pharma refers to the partnership between pharmaceutical companies and the FDA, and their leaders go back and forth in power between the two. There is no difference between them, other than that one is supposedly a government entity.)

Big Pharma will only offer treatments for symptoms and never a cure for ailments. In fact, cures are bad for Big Pharma because cures do not make money for them. Profits are gained only from numerous, endless, and senseless treatments, never from cures.

Medical science is not modern—it is thousands of years old!

We have an example in scripture of King Ahaziah, who died at the hand of physicians who were the representatives of Baalzebub, the god of medicine, or you could say, the god of pharmaceutical drugs, because that was their primary function:

II Kings 1:2-3 Now Ahaziah fell through the lattice of his upper room in Samaria, and was injured; so he sent messengers and said to them, "Go, inquire of Baal-Zebub, the god of Ekron, whether I shall recover from this injury." But the angel of the Lord said to Elijah the Tishbite, "Arise, go up to meet the messengers of the king of Samaria, and say to them, 'Is it because there is no God in Israel that you are going to inquire of Baal-Zebub, the god of Ekron?'

II Kings 1:16-17 Then he said to him, "Thus says the Lord: 'Because you have sent messengers to inquire of Baal-Zebub, the god of Ekron, is it because there is no God in Israel to inquire of His word? Therefore you shall not come down from the bed to which you have gone up, but you shall surely die.'" So Ahaziah died according to the word of the Lord which Elijah had spoken....

A very powerful story there. The priests of Baalzebub could not cure Ahaziah, and because he relied on medicine first to save his life without any thought of the God of Israel, God pronounced the judgment of death on Ahaziah. Notice that they thought the god Baalzebub cured the sick and afflicted through medicines, just as doctors do today. They inquired of Baalzebub; that is, they sought direction on what drugs they should use and what methods they should use to cure him.

Who was Baalzebub? Baalzebub, the god of medicine, was the “god of dung” or the “god of filth.” Ancient physicians guided by their god Baalzebub used filth to try to prevent or cure disease, just as in modern medicine. Pharmaceutical companies concocted and doctors injected people with polio vaccine made from monkey pus during the 20th century. That is a fact.

According to *A History of Medicine*, page 641, “The inoculation of human pus from small pox cases had been known since far distant times.” Many of us in this room and within the sound of my voice had pus or other filth put into our systems in the form of diphtheria, tetanus, smallpox, polio, or other shots. And now they are finding that there is cancer as a result of that, decades later. Many of the Baby Boomers who received those polio shots are getting cancer from that very things, and they have documented that.

Baalzebub was called by various names in various parts of the world. According to *A History of Medicine*, page 122, in ancient Greece he was known as Aesculpius and “appeared in the form of a serpent”—a type of Satan!

On page 121, we are told, “The Semitic peoples of Syria, Palestine, and Phoenicia worshipped the god of healing Esmun ... who was often represented as holding a rod in his hand about which are twined two serpents.” We immediately recognize that symbol

Pages 74-75 tell us that this is the emblem of Mercury, the Greek god of commerce and thieves, and is the emblem of modern science.

According to *Medicine and Man*, page 59, “The serpent was by no means confined to the Greeks. It figures in almost all primitive medicine.... The serpent was synonymous with wisdom ... it knew both good and evil—poison and antidote—and...was the ally of the doctor.”

The symbol today for the medical profession, as well as the healthcare and pharmaceutical industries, is two serpents around a staff. Obamacare, Agenda 21, Codex Alimentarius, and the UN are all Satan's plan on steroids. It is coming fast and furiously to enslave everyone.

Even in ancient times, men believed God worked through the doctors with their knives and drugs, but they did not realize that this was not the true God of the universe, but it was the one whom they worshipped as a god, Satan the Devil.

He appeared as a serpent in the Garden of Eden and deceived Eve into taking of the tree of knowledge of good and evil. What did he tell them? “You shall not die.” Immediately, he tried to take that responsibility from God, and what did he do with it? He gave it to his priesthood—the priest-doctors.

The word “pharmacy” comes from the Greek word *pharmakaie* or *pharmakon*. In Greek, it means “the use of or administering drugs”, “medication”; i.e. (by extension) magic (literally or figuratively). The ancient pagan priests and the modern doctor-priests of medicine administer drugs they know cannot cure anyone. That makes them complicit.

Drugs are poisons; they do harm to the body. According to *Encyclopedia Britannica*, 11th edition, the article “Pharmacy” tells us that “pharmacy,” in the original Greek language from which the word comes “signified the use of any kind of drug... and hence also poison and witchcraft.”

God says that “pharmacy” translated “witchcraft” or “sorcery” in Galatians 5: 20 is a work of the flesh, and is one of Satan’s deceptions: trusting in chemicals instead of God to get rid of disease or pain.

Propheying the finality of Babylon's fall, Revelation 18:23-24 says,

Revelation 18:23-24 For your merchants were the great men of the earth, for by your sorcery [Gk. *pharmakeia*] all the nations were deceived. And in her was found the blood of prophets and saints, and of all who were slain on the earth.

According to *Thayer’s Greek-English Lexicon*, this Greek word *pharmakeia*, translated “sorcery” or “witchcraft” in verse 23, means, “the use or administering of drugs.” So, it literally says, “By your [i.e., Babylon’s] use, preparation and administering of drugs, all the nations were deceived.”

What was Jesus Christ’s primary concern with regard to the disciples’ question in Matthew 24 of “when will be the end of the age?” “Jesus answered and said to them: “Take heed that no one deceives you” (Matthew 24:4).

This world’s health problems and drug addictions are all because there is no God in Israel anymore in the minds of the people. The final judgment regarding the use, preparation, and administering of drugs is prophesied:

Revelation 21:8 But the cowardly, unbelieving, abominable, murderers, sexually immoral, sorcerers, idolaters, and all liars shall have their part in the lake which burns with fire and brimstone, which is the second death.

According to *Strong's Interlinear Greek-Hebrew Dictionary*, “Sorcerers” here is the Greek word *pharmakeus*. It refers to a druggist, pharmacist or poisoner.

Those who prepare and administer drugs are in serious danger of being utterly and finally burned in the lake of fire because they are in the same serious sin classification as murders and liars and idolaters—unless they repent of such sins, which thankfully many of the will—hopefully most.

In ending, let me give you one footnote of caution: If you are taking any drug repeatedly and continuously, you are addicted to that drug either physiologically or psychologically and you should NOT stop taking it cold turkey because the withdrawal symptoms could cause adverse reactions, even death. I am not telling anyone to stop taking pharmaceutical drugs.

If you are in this situation, you are already a slave to the medical industry and Big Pharma. Your doctor-priest should be consulted regarding how to safely wean yourself from the drug, if that is your decision—and it is your decision, not anyone else's. This is a personal decision only you can make in consultation with your God, whether your God is the god of medicine or the God of the Universe. No human being can or should judge you in this. This is between you and God! I am not saying, "Don't take any more drugs." It is totally up to you. But I thought you should have the information of the origin of all of this and where it is headed. I don't really believe that anyone who is duped into taking some drug is going lose their salvation over that, unless it is more important to you than God Himself. But that is strictly between you and God on how you handle that; no human being can judge you on that. I feel very strongly about this, that it is endangering people, it is harming people, and it is killing people, and you should have some of the facts behind this.
